

Black Label Pop-up Sales

Set up stores quickly, easily and cost-effectively

Whether you're looking to launch a new product, sell more existing products or simply engage more closely with your customers, streamline your store set-up with Black Label Pop-up Sales.

Black Label Pop-up Sales vs traditional POS

SET UP FAST

Import products from a spreadsheet and start selling in hours, not days or weeks. Eliminate the time-consuming and costly task of setting up traditional Point of Sale terminals.

NEVER MISS A SALE

Continue selling even if power is lost or wifi or mobile network is down: both common challenges with traditional Point of Sale terminals.

REDUCE ADMINISTRATIVE OVERHEAD

Export transactions and import into your Point of Sale or ERP system. This eliminates the cost and hassle of manually reconciling pin pad transactions with your Point of Sale or ERP system.

ISSUE COMPLIANT RECEIPTS

Quickly issue a compliant Tax Receipt rather than a payment-only receipt.

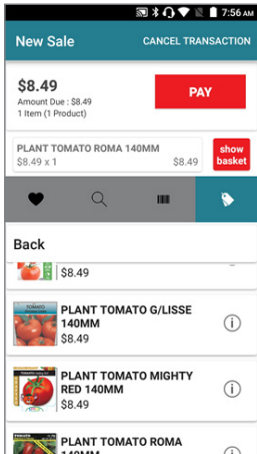

MANAGE MULTIPLE DEVICES OR LOCATIONS

Control devices and inventory centrally with full role-based security in the Black Label Management Console.

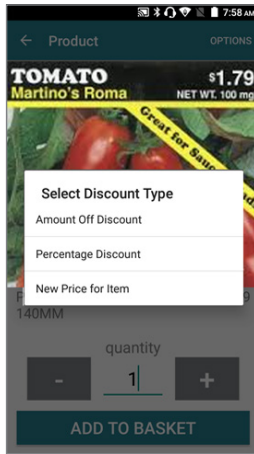

Features

MAKE SALES

Capture sales by:

- scanning barcodes
- browsing by category or favourites
- searching by keyword

APPLY DISCOUNTS

Apply discounts:

- amount off
- percentage off
- new price for item

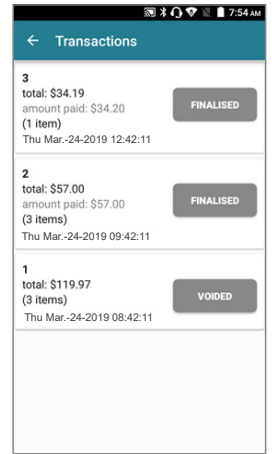

TAKE PAYMENT

Accept payment by credit/debit card or cash.

ISSUE RECEIPT

Print a receipt on your Bluetooth printer or email directly to your customer.

VIEW TRANSACTIONS

View all transactions and reissue receipts as required.

Set up in 3 simple steps

1. LOAD PRODUCTS

Export products and prices from POS/ERP and import into Management Console.

2. START SELLING

Install app on mobile device and start selling.

3. UPDATE POS/ERP

Export transaction file via Management Console and import into POS / ERP.
